

Content Management, Sharing, and Cross Platform  
Collaboration for Mixed Reality

makeSEA

THE EASIEST,  
FASTEST, BEST  
WAY TO SHARE  
**YOUR CONTENT**  
**IN EVERY REALITY**

# EVERYONE HAS A STORY

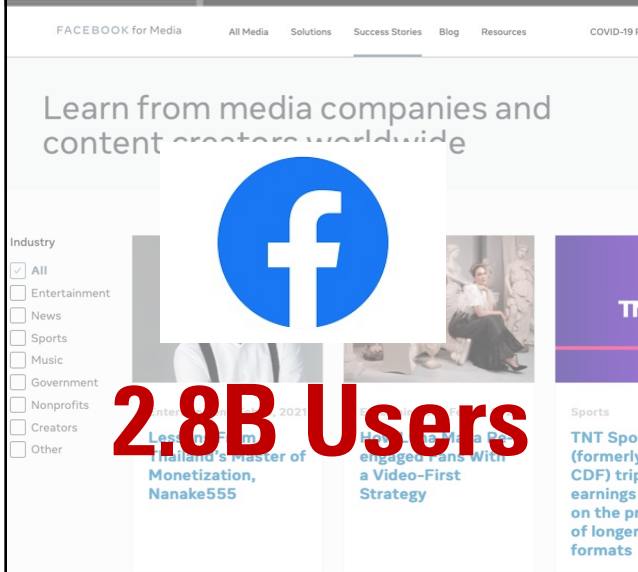

**2B Users**

**1B Users**

**2.8B Users**

**140M Users**

# A VENUE FOR EVERYONE

There's a venue for photos, video; advertisers get it, to the tune of \$50B+ per year (Facebook). There are even niche venues for gaming like Twitch and ROBLOX.

# MIXED REALITY (AR/VR/XR)

Guess where we are headed?

*Hint:* it is as close to first-hand as you can get: Virtual, Augmented, Mixed Reality

With these technologies, you can put any audience in any location, at any scale, as if together in real life.

---

# INFLUENCE

- Research shows that using augmented (AR), and virtual reality (VR), is more compelling and more likely to persuade an audience to buy, learn, and understand.
- makeSEA empowers everyone to deliver content that connects with an audience like no other medium can.

The problem is that it's really hard to share content in XR – especially by *mixing* content users themselves are producing already, like video, 3D design models, and real-world scans. Gaming and movie studios do it –but imagine if anyone could use this technology to tell their story if it is A: easy, and B: relevant to their content. Now make it work across platforms and so the content can evolve and be updated and you get:

makeSEA

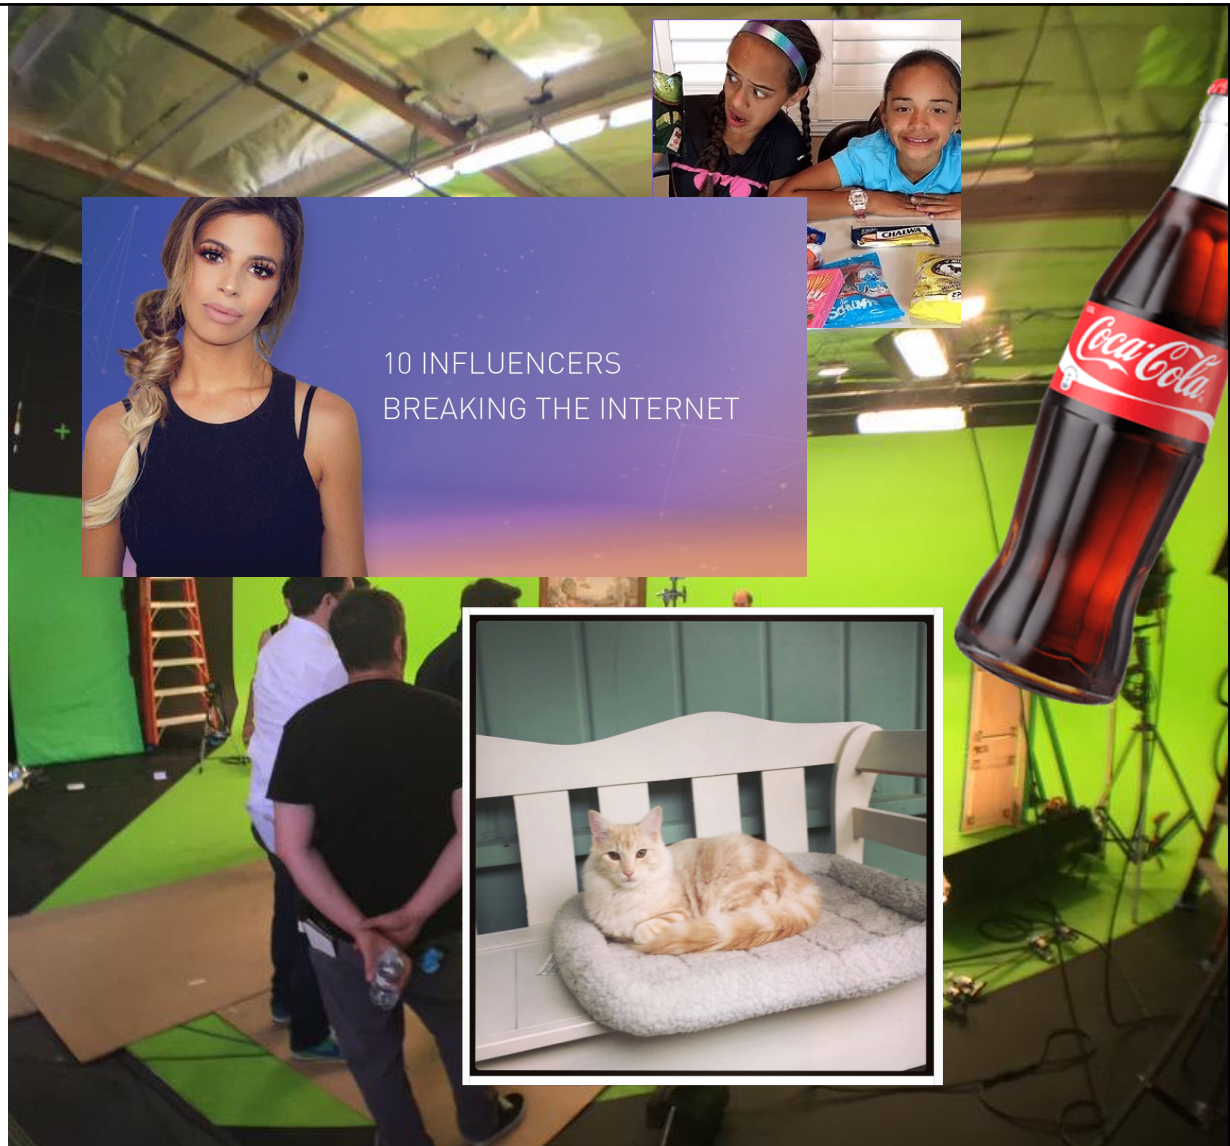

HOW DO I WORK THIS?

# POOF... YOU'RE A MIXED REALITY PRODUCER

## makeSEA

is a platform that solves the "hard" part of XR publishing by making it easy like social media posting and puts mixed reality in the hands of every creative, every teacher, every business, EVERYONE.

... isn't that what YouTube did for video?

---

# 10X-100X TIME SAVINGS, REFRESH, REPEAT

- makeSEA reduces AR and VR production time by an order of magnitude -or two- vs existing methods
- Content can be blended from multiple sources to tell a better story: 3D models, real-world scans, video, and more
- Hosts can interact with their audience LIVE
- makeSEA helps publishers to keep things fresh and relevant by empowering them to update, re-use and improve experiences over time as the content and XR technology mature

## PERSPECTIVE

 **YouTube**  
= \$15B in Revenue

*Instagram*  
= \$1B Acquisition

March 9, 2021, CNBC:  
“Roblox goes public  
Wednesday — **here’s how  
indie game makers turned it  
into a \$30 billion company”**”

[makeSEA](#) is analogous to these services, but for XR, with a platform capable of also serving mid-market business and enterprise sectors.
